

## Temperature Quilt

Make a record the average daily temperatures in the town where you were born in a keepsake quilt. Also great for a new baby quilt that will evolve as the year goes on.

Supply list:

5 yards of 15-20 assorted colors for a 60" x 80" quilt

Thread

Rotary Cutter

Ruler

Sewing Machine, with cord, etc.

List of temperatures, in order, that you want to use

The first class will be strictly planning. What size do you want, how many colors do you want to use, what order should they be? Shop as necessary.

You will need to bring a list of the temperatures to the first class that you are using. To find historical data back as far as 1945, go to:

[www.Farmersalmanac.com](http://www.Farmersalmanac.com)

Click on Weather, then Historical Weather

Type in the location and year that you want. This site goes back to 1945. You'll have to record each day one at a time. When doing so, record in order by date.
